VOLUME 28: NUMBER 9

DIDSBURY, ALBERTA, THURSDAY, MARCH 3, 1949

\$2.00 A YEAR; 5c A COPY

## C. Cressman Elected To Village Council

A record number of ballots were polled at the Village council elections held Monday, February 28, and C.A. Cressman gained the seat on the council by defeating the retiring councillor, S.J. Garrett, by the narrow margin of 3 votes. Final results were Cressman 98, Garrett 95 and 7 ballots were spoiled.

A rink comprising Sam Garrett, Dick Garrett, Jim Foster and Walter Martin took in the Beltsker bonspiel last week.

## CARBON BRANCH OF LEGION HOLDS CARD PARTY

Only a small crowd appeared for the Legion card party held on Wednesday, February 23, and the following players won prizes:

Whist—Mrs. P. Schmierer, Leslie Obayag, Cribbage—Mrs. C. Martin, Leslie Marcell.

Mild weather has delayed completion of the farmers bonspiel held at the local curling rink. As the weather turns colder the bonspiel will be completed and a full report will appear in The Chronicle.

## VANCOUVER GIRL RECOVERS SPEECH

A miracle occurred for Laverne Tindale, 13, of Vancouver when she got her speech back. She became paralysed and mute as the result

of an accident four months ago. Imagine her surprise when she said "shoes" when shown a pair of ballet slippers.

## LEN FOXON SKIPS WINNING RINK AT SCOTTISH RITE BONSPIEL

Curling in the Scottish rite bonspiel held at the Glencoe Club, Calgary, on February 22, Len Foxon skipped his rink to victory against forty other curlers who took part in the event. Members of the winning rink were Len Foxon of Carbon, skip, Dr. Carlsell of Innisfail, third, Jim Kirby of Didsbury, second and Roy Bond of Irtana lead.

## Miss Eileen Foster Weds in Calgary

Knox United Church, Calgary, was the setting for a quiet wedding Saturday afternoon, January 29, when Eileen Jane, daughter of Mr. and Mrs. W.H. Foster of Bonnow, exchanged marriage vows with Paul Frederick LaRue, son of Mr. and Mrs. H.H. LaRue of Calgary, son, G. T. LaRue of Edmonton, brother of the groom, officiated.

Given in marriage by her father, the bride was given in a classic model of white satin, fashioned with yoke of white embroidered lace and longilly point sleeves on the fitted bodice, while the long full skirt was accented at the waistline with a Polonaise drape of self material outlined with lace. A petal headress, fashioned of embroidered net, held in place "her floor-length veil, and she carried a shower bouquet of American Beauty roses.

Miss Willis Foster attended her sister as maid of honor and Miss Nora Foster was her sister's bridesmaid. Their identical floor-length frocks were fashioned of blue tulle and they complemented their ensembles with matching chapel veils and long blue gloves. Pastel-toned carnations composed their bouquets.

The groom was attended by his brother, Paul LaRue, and the guests were ushered by Herbert Weber of Olds, cousin of the groom, and Robert Bench, the groom's brother-in-law. During the signing of the register Ian Smith sang "Because."

Following the service a reception was held at the home of the groom's parents, where the bride's mother, and the mother of the groom, received with the bridal couple.

Rev. G. A. LaRue proposed the bridal toast, to which the groom responded.

Mr. and Mrs. LaRue have taken up residence at 1903 11th St. W. Out-of-town guests at the ceremony included: Mr. and Mrs. A. Wood, Miss Nora Foster, Miss Will Foster, Rev. G.A. LaRue, Marlin Bonjoux, and Kelly Watters, Edmonton, Mr. and Mrs. E. Weber, Olds; Mr. and Mrs. W.G. Weber and family, and Mr. and Mrs. Philip Weber, Carstairs; and Mrs. J. Alderson, Jr., Carbon.

Miss Eileen Foster is the daughter of Mr. and Mrs. W.H. Foster, former residents of Carbon.

Miss Doreen Greig of Forest Lawn returned to her home following an appendicectomy operation in the General hospital, and is now progressing nicely.

Mr. and Mrs. Morris Switzer were Calgary visitors over the week end.

STANDING OF CONTESTANTS IN CARBON QUEEN CONTEST

Complete results of the Queen contest are listed below:

Shirley Saunders — 1914

Phyllis Schuler — 1900

Rose Dresser — 1881

June Coates — 1876

The Lions Club wishes to extend a sincere vote of thanks to the carnival Queen contestants and all others who helped make the event a success. Thanks, folks.

## Extra 20 Cents Per Bushel To be Paid on Wheat

Trade Minister Howe announced last week end at Ottawa that the initial price of Western wheat delivered to the wheat board since August 1, 1945, has been raised from \$1.55 to \$1.75 a bushel.

He said checks to cover the extra 20 cents a bushel, representing an over-all total of \$24,000,000, will go out at the rate of 40,000 a day starting March 31 and will give first preference to areas which have had poor crops in the last two years.

The decision of the government would mean that for the five years ending in mid-1950 the Western producers would get at least \$1.75 a bushel for No. 1 Northern wheat, basis Port William, Port Arthur and Vancouver.

The original price laid down by the Wheat Board was \$1.55. The

first 20 cent raise was announced ten months ago, meaning an extra \$155,000 for the farmers.

The second increase in price was attributed largely to the \$2-a-bushel price obtained for the last two years of the four-year Anglo-Canadian wheat contract.

The guarantee would terminate July 31, 1950. The Wheat Board will have received more than 1,000,000, 000 bushels up to March 31 of this year and that would mean another \$24,000,000 for the producers.

In all, the two increases would give them \$370,000,000 beyond the original price of 1945.

The board already had the certificates to show where the checks should go and they would be sent out just as fast as the mails could handle them.

## A LETTER TO THE VOTERS OF THE VILLAGE OF CARBON

Let me first of all thank each and every voter for your very loyal support on the 28th of February, 1949, to all those who assisted in supporting the campaign.

As I very reluctantly accepted the nomination, I felt at the time that it was the wish of the voters to have a change. Now the election is over and we all go on our way.

As you all know I promised absolutely nothing before the election but now I do.

needs: or thing is two

Our fire department. Let's get this thing in working order.

Let's get about the water works? We will soon find out about this project. What has to be done and the best way to do it, the cheapest, and let everyone of the cost and what it entails, and what the possibilities are.

About the curling rink—hasn't it got a future? We need more ice. Something has to be done about it. I have an answer for that one, too.

Our garbage disposal system needs a general overhaul. We intend to do something about this also.

The need of a new hall is very great. Let's see what can be done about this.

All these things can be accomplished and plenty more if everybody pulls together. We intend to have our meetings well advertised, let everybody turn out and support them, and let us hear of more ideas. This old town, and I mean Olds, will take on a "new look."

## Legion Plans Auction Sale

There was a good attendance of members at the Legion meeting held on Monday, February 27, The coming country auction sale being put on by the Legion was discussed and committees appointed as follows:

Pick-up—F. Foxon, D. Martin, and D. Prowse.

\*aying-out—J. G. Foster, J. P. Foster.

to be held

(to be held)

S.J. Cannings, V. Hawkins

D.B. Gilbert.

The date of the auction sale is Saturday, April 2, and articles both big and small may be put up for auction. Lists of things to be auctioned may be left with Code Bros. and the fee for the sale will be the usual five per cent. Articles of value may be entered under a reserve bid. Any donation to the sale would also be greatly appreciated. N. Boose will be the auctioneer and S.F. Torrance clerk.

All those wishing to put articles up for auction are requested to get their lists in by Saturday, March 5, so they may appear on the sale bill. However, lists may be handed in up until March 28.

but everyone will have to get behind it, and well really succeed. Let us all work for our Carbon, a place well want to move into, and not out.

Yours for a still better town.

C. A. CRESSMAN

## THE FARMERS' EXCHANGE

HOW....

## "Ceresan" M PROTECTS YOUR CROPS

**WHEAT**—"Ceresan" M gives almost perfect control of seed-borne stinking smut, but not loose smut. Also reduces seedling blight and root-rot losses.

**OATS**—Both loose and covered smuts are generally controlled by "Ceresan" M. Promotes better stands by combating seed decay, seedling blight and damping-off.

**BARLEY**—"Ceresan" M gives almost complete control of stripe disease, covered and black loose smuts (not brown loose smuts) and reduces soil-borne diseases like seedling blight.

**RYE**—"Ceresan" M usually controls stinking and stem smuts and generally improves yield and quality through effective control of scab seedling blight and root-rot.

**FLAX**—"Ceresan" M usually reduces damping-off and seed decay of flax caused by seed and soil-borne organisms which results in better stands and greater yields.

## COLUMN

Following is a complete financial statement for the recent Lions Club Ice Carnival.

Receipts—Sale of Queen vote tickets 722.20; gate receipts 171.00; donations for advertising 100.50.

Total \$1003.70

Expenses—Advertising 65.46; costumes 25.50; Queen contestants' prizes 108.76; event prizes 111.00; door prize 14.50; Queen draw prize 15.00; Mrs. Schmalz' troupe of fancy skaters 34.00; Insurance on event 9.85; miscellaneous (phone, etc.) 7.45

Total \$368.78

Net profit \$616.92

The proceeds from the carnival will be allotted to the Shatin Bink Community Betterment Building Fund.

\*\*\*\*

To many who would like to know the approximate cost of running the skating rink, following are the expenses for a 5-month season:

Caretaker 335.00

Lights 50.00

Coal and cartage 65.00

Miscellaneous 20.00

Total approximate expenses \$475.00

The sale of season tickets and casual skating is approximately \$160.

The present season has seen some change in the price of admissions. All children under 10 years of age are now admitted free; all other school children were allowed a 25 per cent reduction in admission; and no charge has been made to hockey clubs for use of the ice thus enabling them to better meet expenses. Several community skating parties were also admitted free.

## HESKEITH AND CHARLES NEWS

A successful dance was held at the Cambie school on Friday, sponsored by the Grand Forks hall club. A good crowd was in attendance.

Mr. Bruce Gilbert spent the week end at his home at Delburne.

Joe and George Appleyard were Calgary visitors last Monday.

SUCCESSFUL CARD PARTY HELD BY A.Y.F.A.

The A.Y.F.A. held a very successful card party in the Anglican Church basement on Friday, February 25, and following are the prize winners:

Ladies—Jat. Mrs. Ernie Fox; consolation, Mrs. Dick Poon.

Men—Jat. Rev. I.W. Way; consolation, Rev. Kary.

**SCHOOLBOY KILLED AND FOUR PUPILS INJURED** — Young traffic victim was taking the "safe way home" from school when he was struck, and thrown nearly eight feet. Four other children were injured. Accident occurred on No. 7 highway at intersection of Bloomington-Preston county road. Broken line shows path of transport to where children were hit. Truck was in a collision with a car, driven by Charles Sellers, principal of Breslau school. After the collision it swerved right and plunged into group of pupils.—S.N.S. photo.

**HERCULEAN WALK SAVED**

**PHOTO** — Jack Pair, chief engineer for Suburban Airways, who piloted the rescue plane that found Bob Milligan in the wreckage of his aircraft beside the bodies of his two Indian trapper passengers, said it was miraculous that anyone survived. Milligan's plane crashed on the thick ice of Peter Long lake, 26 miles north of Gogama, Ont., as he was making a landing to drop Richard and Sidney Neveas, brothers, at their winter traplines. The Indians were instantly killed and Milligan, with both feet broken, lay unconscious in the wreckage for four hours beside their bodies in 18 below zero weather.

**BIT OFF MORE THAN HE COULD CHEW**—This was the result when a two-pound bass tried to bite off more than he could chew while swimming around Black Rock Lake in Atlanta, Georgia. The two bass were found recently by Newton Thomas, who holds his catch.

**STAND-IN FOR A SITTING**—Mimi, a cat with an over-developed maternal instinct, receives encouragement from Lester Stephenson, a Washington State grocery store owner, as she waits patiently for two fertile chicken eggs to hatch. Mimi has been sitting for 18 days.

**WHERE PLANE CRASHED**

**KASHMIR—VOTES INSTEAD OF GUNS WITH HELP OF U.N.**—New Year's Eve, 1948, was an important date in Vale of Kashmir. At that moment 14 months of hostilities ended when a cease-fire order was issued simultaneously by the sister states of India and Pakistan. Now the road is open to a peaceful solution by means of a plebiscite to be held under the auspices of the United Nations. The agreement was the climax to persistent U.N. efforts to bring about peace between the two states and to keep 400,000,000 people out of a war. Co-operation of all parties involved in the conflict facilitates operations of the U.N. commission in the trouble area. Here Kashmir's deputy prime minister, Bakshi Chisam Mohammad Sahib, (centre), assists the U.N. field team in planning a tour of inspection of the mountainous territory of Jhilmirang.—Official United Nations Photo from S.N.S.

**DRIVER ESCAPES DEATH**—Driver of an ice truck which broke through the ice of the St. Lawrence river, five miles east of Cornwall, Ont., Fernand Regnier scrambled to safety as it sank into six feet of water. Here, police and helpers attempt to salvage truck. Regnier was clearing snow in preparation for ice-cutting when the eight-inch crust, weakened by sun, gave way.—S.N.S. photo.

**POLICEMAN TURNS INTO SONGWRITER**—The only member of Montreal police force who has had a song published, Det-Sergt. James R. Croghan is seen with his wife and two of their three children, Texas Beverly, six, and Shannon Lynn, four, as they took over the tuneless score of the song, "You Stood There". On his night patrols, Croghan started whistling and humming, and thus received the inspiration for his tune.—S.N.S. photo.

**BE KIND TO DUMB ANIMALS**—Penny the Boxer looks rather sorrowful as his seven-year-old mistress, Wendy Moffett, spoons him some food in the Moffett home at Mountside, N.J., where both are recuperating from a ducking in a lake near their neighborhood. The sorrow probably stems from the tub Penny has to wear. Walking with Wendy and the latter's friend, Patricia Durand, the dog fell into the lake. The girls chased it and in trying to save it, fell in, too. Wendy got out, rescued the dog and then called for help. Patricia, rescued, is now in hospital recovering from exposure.—S.N.S. photo.

**GIRL DRIVER DIES** — Driver of this 1948 model car, seen virtually wrapped around a tree, Dolores Smyth, 20, of Detroit, was fatally injured when it went out of control when rounding a curve at the top of Vinegar Hill on Highway No. 3 near Cedar Springs, Ont. Owner of the car, Joseph Kulonowski, Detroit, was badly hurt. The girl was pinned in wreckage for half an hour before rescuers could remove her. She died in hospital at Chatham, Ont.

**"LOVE" BY THE POUND ... 252 POUNDS NO LESS!**—Philip Edwards, of London, England, shown here with his bride, advertised for a wife weighing not less than 196 pounds. The new Mrs. Edwards, weighing 252 pounds, filed the bill and romantically speaking, bent Mr. Edwards over. The latter was a widower whose former wife weighed 210 pounds.—S.N.S. photo.

## SPORT

Periods In Which  
Goalkeepers Are  
Tough To Score On

There are certain periods in which National League goalkeepers are toughest to score on. For example two of the six N.H.L. cage custodians allow less goals to get past them in the third period; two are harder to score on in the second stanza; one is at his best in the opening session; while one is at his best in the first and third periods.

Up to and including games of February 10, Harry Lumley of Detroit had less goals scored against him than any other goalie. In the opening session; while one is at his best in the first and third periods.

Up to and including games of February 10, Harry Lumley of Detroit had less goals scored against him than any other goalie. In the opening session; while one is at his best in the first and third periods.

Up to and including games of February 10, Harry Lumley of Detroit had less goals scored against him than any other goalie. In the opening session; while one is at his best in the first and third periods.

## Cattle Associations Meet

Directors of the Alberta-Angus Association snapped at Toronto were left to right: Cameron McTaggart (Ont.); Tom Henderson (Ont.); Prof. J. F. Sackville (Calgary); H. Merrell (Sask.); president; Chas. C. Maloney (Alta.); Cowley Webster (Man.); C. Argo (Sask.); and Roy Ballhorn (Alta.), and E. V. McCullough (absent).

Directors of the Canadian Hereford Breeders Association snapped at Toronto were left to right: W. J. Edgar, Innisfail, 2nd vice-president; L. W. Reid, Irricana; W. S. O'Neil, Banff; Ont.; J. A. Paul, Okotoks; Alex. A. Mitchell, Lloydminster; S. F. Gould, Rosalind; L. W. Wood, Armstrong, R.C. 1st vice-president; Geo. Ross, Toronto, president; L. V. Robson, Deane, Man.; Wilbur Collier, Cravre, Sask.; and D. A. Andrew, secretary.

## Winners in Dairy Competition

Winners of prizes in the various competitions at the Alberta Dairywomen's Convention in Calgary were left to right: front row: V. Bellamy, South Edmonton; D. H. McCullum, secretary of A.D.A.; M. Hansen, South Edmonton; E. Lucas, Brudenheim; D. A. Fre, Alberta Minister of Agriculture; Geo. Ruffler, Ponoka. Back row: E. A. Montgomery, Crossfield; E. A. McMillan; A. A. Froust, Red Deer; G. Shierke, Hildburgh; N. E. Davidson, Glenwood; M. Manchuk, Telford and J. Kalket, Red Deer.

**TURNING TO ASTRONOMY**  
LONDON—J. R. Cox, editor of the Popular Boys' Own Paper, says youth is tired of poetry and school stories. Home entertainments have been replaced by movies and radio. Astronomy, a craze among the boys in the 1900s is coming back into favor.

U.S. MAY HOLD 1950  
ICE HOCKEY CHAMPIONSHIP

STOCKHOLM—The 1950 amateur world ice hockey championships will probably be held in the United States.

The International Ice Hockey Federation, meeting here during the current championships (tournament), reached that decision with a proviso. The federation decided to accept an American invitation if the United States will put up part of the money required to send European teams to North America. The Americans will study the proposition and announce their verdict after May 30.

288 men in queue.

BRITAIN GETS BIGGEST  
INFLOW OF TOURISTS

LONDON.—The Board of Trade reported 594,000 tourists visited Britain in 1948, biggest influx ever recorded and 108,000 more than in 1947.

## TROPICAL CLIMATE

The Northern Territory of Australia has a tropical climate, with the wet season from November to April and the dry from May to October. The population of these regions is sparse.

# NEW ICE AGE LOOMING FOR WORLD BUT CURRENT COLD IS NOT LINKED

ATHLASSAGA GLACIER—Eventually, say scientists, such huge ice fields will obliterate some of our cities.

**By JOHN F. SEMROW**  
Central Press Canadian  
WASHINGTON—A new ice age is racing upon the earth, say scientists, but there is no need to get worried to the point of making preparations for moving to the tropics.

As the geologists and astronomers figure time, it will be only "tomorrow" that mountains of ice will obliterate the sites of present skyscrapers, but in everyday reckoning that means thousands of years. Nevertheless, it is inevitable, say the scientists.

New knowledge about the four great invasions of ice which already have occurred on the globe in comparatively recent geologic times confirms the scientists in their predictions, but they hasten to add that such long-range forecasts have nothing to do with, for instance, the unusually severe winter experienced this year in California and the west.

The fact that Old Man Winter has been throwing his weight around considerably of late may indicate that we are in a cycle of colder weather, which will bring back the snow grandfather knew, but this is only remotely connected with the gigantic forces which periodically usher in an ice epoch.

Weather experts have been saying for more than five years that the swing in on toward harder winters and that the next century will see generally cooler weather.

However, they do not expect any spectacular changes; those deep-seated forces everyone seems to remember may largely be imagination or impressions drawn by youngsters who have since grown up and no longer are "awe-high to the grasshoppers."

**Interest Mounts**  
On the short pull, the weather cycles seem to cover about 100 years. In the first 318 months of 1892-1945, 149 months were above normal temperature and 169 were below, indicating a relatively cold era.

It was the reverse during the last quarter century, with 181 months above average and 127 below. However, the wide fluctuations of any given winter or summer usually obscure such trends for ordinary observers.

The weathermen are not sure why the 50-year cycle. Some of them speculate that it is caused by a distortion of the earth's path around the sun.

It makes little real difference, but the coming of an ice age is an entirely different matter. Even though no scientist of today will live to see the catastrophe by a dozen or so thousands of years, according to even the shortest estimates, they are taking a warm interest in the situation.

Dr. Donald H. Menzel of Harvard is author of the latest and most widely accepted theory as to why on four occasions in the last million years the great ice caps have extended over a large part of the earth.

He blames clouds of star dust. These are interstellar clouds which would be rocket travelers have been warned about if they start hopping to other heavenly bodies toward warmer climates.

Great ice sheets form, they explain, whenever the atmospheric temperature is high enough for large quantities of water to evaporate from the seas and oceans and be deposited in heavy snow at the focal points of the tremendous glaciers. Conditions have to be just right—or wrong, depending on the view you take—so that the snow will be heavy enough but the temperature will not be high enough to melt it.

That is what happened some 50,000 years ago in three great centers

HARRY MAMMOTH—Creeping wall of ice obliterated him and his kind.

—Labrador, just east of Hudson bay, and just west of it. It was not at the poles, for it was too cold there. The sheets spread irresistibly outward and southward to what now are the Ohio and Missouri rivers.

**What Scientists Believe**  
The reason for it all seems to have been the clouds of space particles which did not block to any great extent the rays from the sun, but did trap the radiations back from the earth and caused a slightly warmer climate. This is certain to happen again, warm the scientists.

There were ebb and flows of the great ice sheets, and during some of the former the temperature may have risen to a point where tropical forests flourished even in the Arctic and Antarctic regions, accounting for deposits of coal in Antarctica and fossil mangroves in Greenland.

Some scientists believe that today we are living in one of the periodic retreats of ice and that it is just an interval between extensions of the glaciers which now have retreated to Greenland and the polar region.

The last ice age wrought tremendous changes and created such prominent markings on the earth as the Great Lakes. It also was a period of supreme trial for all living things: elephants, camels and rhinoceroses

ICE AGE—Covered Great Lakes, existed in North America prior to that time as well as the sabre-toothed tigers, mastodons and mammoths. They all disappeared. Man appeared then, at least in Europe, and weathered the storm.

Scientists scoff at the possibility that man might be able to stem the tide of ice even with his predictions. The biggest hope for using the atom to influence weather, they point out, would be to generate great heat from the atom and project it into the atmosphere.

However, the trouble with such artificial warming of the atmosphere is that it is to be done on a premature for invasion if it were done for several thousand years.

**He Grows And Sells Corn Brooms**  
This Farmer Grows And Processes Brooms And Whisks  
As A Profitable Side-Line To General Farming

Night: Broom corn grows in the field on farm of Steve Nytray. This stalk reached height of 16 feet. From H. Nytray makes his corn brooms. Above left: Heads of corn before they are threshed. They are heavy with seed. Brown corn does not have cob like other corn. Outside farmers grow, and are planted in for fertilizer. This is Nytray's son John. Nytray's daughter, Mrs. Martha Hulse, who helped him plant, soon grew profitably, shows dried "whisks" of broom corn, right, after threshing, drying.

Nytray "custom built" brooms, left. They are finished by hand.

# GARDEN NOTES

**Time To Plan**  
The experienced gardener doesn't wait until the sun and soil are warm before starting to get ready for planting. No matter what the weather is like outside planning can commence anytime, and there is fun and value in this planning, too.

A good Canadian seed catalogue and a Government bulletin or two will prove invaluable. Scrutinize all the time-worn jokes about the seed catalogues, these publications are packed with real and vital information. With the bulletins, they will tell you when the various flowers bloom, the colors, and whether they are hardy or tender and safe to plant in your neighborhood. Heights are also given and the type of growth. Only with such information can one go ahead and plan real borders and other layouts can be sure there is something in bloom right through until Fall, and that the little things will not be hidden by the tall.

With the vegetables, the catalogues and bulletins will help in the planning and also in getting satisfaction when the garden starts to yield. One will learn from the descriptions whether certain varieties are hardy, half-hardy or tender, and how early from planting to maturity. All this is vital information. One will read about bringing in the plants in the vegetable line, improvement in old standbys.

**Not Too Close**  
Commonest mistake of most gardeners is to plant too close together. This is not only a waste of seed or nursery stock, but it also encourages weak or poor growth. With shrubs and trees, the result is a jungle with far too much shading that the house and weak growth that is liable to fall a prey to leaf-eaters. With annual flowers and vegetables, proper development is impossible, the vegetables are liable to be stringy and tough, the flowers bunched so closely together that they will not bloom properly.

Generally speaking, all plants require at least half as much space between them as they are high at maturity. With big trees this means 20 to 40 feet, with carrots it means only about 2 inches, with corn or stalked tomatoes 18 inches. On the seed packet will be given the proper spacing.

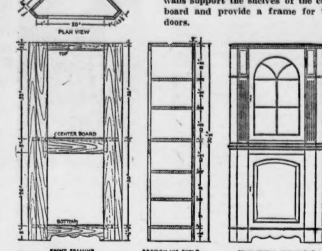

Will bigger seed like beans, peas, corn, etc., spacing will be easy, but it is much more difficult with the fine seeds of carrot, lettuce or alfalfa. Such things can be spread evenly by mixing with a little dry sand and sowing the mixture. In any case, no matter how carefully we sow some later thinning as the plants develop will be advisable.

**First Jobs**  
There are some outdoor jobs that can be started almost as soon as the ground is bare. One of the first will be lawn repairs or the starting of new ones. Grass seed makes its best growth in cool weather. Sweet peas also must go in early for best results. They need to develop their deep growth before the soil gets warm.

**DISCOVERY ACCIDENTAL**  
Dr. Alexander Fleming discovered penicillin accidentally in 1928. It is a chemical manufactured by common molds such as those of bread, cheese, moldy, etc. Dr. Fleming did not take out a patent on penicillin, but dedicated it to the good of all peoples.

Brazil is the fourth largest country in the world.

# Cupboard In The Corner

THE above drawings and construction are shown of a corner cupboard. It will be noticed that the doors support the shelves of the cupboard and provide a frame for the doors.

THE above drawings and construction are shown of a corner cupboard. It will be noticed that the doors support the shelves of the cupboard and provide a frame for the doors.

The drawing shows a cupboard of fairly high dimensions, making it advisable to divide the door into upper and lower portions. The dividing rail across the centre gives the frame additional strength and rigidity. Framing of the front should be of mortise and tenon construction with the joints glued and pinned. For all hidden joints in the construction wood screws may be used. To fasten the side walls to the front these fastenings are much better than ordinary nails.

This type of cupboard can be built for kitchen use without the ornamental treatment shown in the drawing on the right. For such practical treatment shown in the drawing as equally pleasing designs can be worked out in patterns less difficult to make, especially where power corners of the shelf plywood and so on tools are lacking.

**Heavy Demand For Meat Products In Spite Of Price**  
ST. BONIFACE, Man.—Ranches on the north-west more than \$80,000,000—passed through the sprawling Union Stock Yards here in 1945, reflecting a heavy demand for meat products in the face of abnormally high retail prices.

Representatives of eight commission firms and from 20 to 25 dealers and order buyers bid casually and verbally for anything from one to 20 carloads of stock, worth \$4,000 to \$5,000 a carload.

The trading by word of mouth is the practice in this terminal market, largest in the British Commonwealth, where about 200 acres of land about three miles from Winnipeg.

The Yards will accommodate 14,000 cattle, 5,000 hogs and 5,000 sheep. Last year the market handled 158,000 head more than were cleared through any other Canadian yard.

A table of cattle prices shows the average received a hundredweight in 1933 was \$2.45, covering sale marketings of 167,721 head. Last year these marketings rose to 323,690 head, with the average price \$1.61.

The removal of the embargo on cattle shipments from Canada to the United States in mid-August of 1948 paved the way for sharply rising prices. Nearly 800,000 cattle were purchased for movement to the U.S., their value being estimated conservatively at \$14,000,000.

Livestock men said the high prices meant that cattle which normally would have come forward early this year were marked in October and November of 1948. They were right in light run of fat cattle this spring.

Returns from livestock last year in Western Canada were "right in line" those for grain, one authority said. The livestock industry and allied processes employed more workers than any other field.

The Union Stockyards were on routes to larger centers of consumption both to the south and east.

**Smile of the Week—**  
Veteran: "I asked that nurse to put a hot water bottle at my feet and she walked away."  
Doctor: "Of course, she's the head nurse."

**RESISTS CORROSION**  
Stainless steel resists corrosion because of the chromium it contains thereby lending itself to hundreds of new uses. Louis Nicolaus Vauquelin, French chemist, discovered and first described this alloy about 150 years ago.

Absentee voting was originated for the purpose of the Civil War and was gradually extended to citizens.

# Helpful Hints

Slip covers won't slip or slide out of shape if you buy rubber knurling pads, cut to two lengths, and insert in the tuck-in space around the cushions.

To retain the life of nylon it is essential to wash them right. Never wring them out, always roll them in a towel to remove excess moisture. Dry away from heat.

In washing silver, hot, mild soap and plenty of good, hot water for rinsing, should be used. Dry with a soft cloth. Silver is better spread out on a cloth after drying to allow it to cool thoroughly before it is packed in a box. It is nice, too, to give silver an extra polish as it is being put back into the safe to be sure that it is dry and to remove fingerprints.

# Trousseau Beauty

## OUR COMPLETE SHORT STORY

## BUT NEVER HUMAN, INDEED! ::

By PHIL GLANZER

EVELYN was alarmed when Sailor McCoskey and the Dugan started arguing loudly at the table at the Dugan Club. The minute Sailor jumped up from his chair and stood threateningly over her, she turned to me and said, "This is terrible! We've got to stop them!"

"Let them alone," I said.

Evelyn looked astonished. "Tot!" she exclaimed, "I'll bet you actually be glad if they fight!"

I figured a little more shock wouldn't hurt her. "Of course I'll be glad. Wouldn't you be glad if you were in my place? And I'll be proud, too." That was the truth, because they were arguing over me. This would be the first time that two men would fight over me, and probably the last.

I can still see the look that Evelyn gave me. "I knew you were that, but I never knew you were that bad. Suppose they hurt each other?"

"They can't hurt each other," I assured her. "Neither of them knows a thing about fighting."

He had risen from his chair too, and I heard him say: "Nobody can try to take Tot away from me and get away with it!"

"Tot," retorted Sailor. "We'll see about that."

That was what the whole argument was about, whether he had prior claim or whether Sailor had a right to him or if I was willing to let him. Now of course that was something for me to decide for myself. I wasn't in any hurry, and he was with me. It was my future that was concerned—something that demanded considerable thought. Besides, I was peevish at like and Sailor. The four of us had come out for a pleasant evening, and I had asked both of them not to discuss the matter. They had promised, but after a while their jealousy flared up.

Their faces were about six inches apart now, and they were talking louder and louder. People around us were beginning to stare.

"Tot!" whispered Evelyn. "You've got to do something. You can't let them fight. You can't just sit there and be glad that you're the cause of it. It isn't decent."

"Perhaps it isn't," I agreed, but she bridged me some lovely publicity. Evelyn almost choked, as she engaged in between the two men. "Of all the cold-blooded, calculating—"

"Maybe you'd feel the same way if you were in my place," I broke in. "Keep in the public eye, and the public pays its money to come and see you. Don't forget I've just signed for a six-weeks' vaudeville tour."

That was true, but my real reason. I just liked the idea of watch-

ing Sailor and Ike having a good fight. I know you'll think I'm terrible to admit it, but I'm trying to tell you exactly how I felt.

Suddenly Evelyn let out a scream, and I turned just in time to see Sailor and Ike having it.

"Oh!" Evelyn yelled, "this is terrible!"

"Don't be a fool," I told her. "Sailor or didn't even touch him, he tripped over a chair."

I was right. The jumped up quickly, and this time he had better luck. He got Sailor right in the nose. Sailor staggered, grabbed the table cloth—and the cloth, glasses and silver crashed to the floor. It was wonderful!

"Nobody stop them!" Evelyn kept shrieking. I put my hand over her mouth, and held it there. "This was easy, because I am quite a bit stronger than she is. Evelyn is very frail, just the opposite of me. When I was a youngster, I could handle most of the boys of my age in the neighborhood. I had quite a reputation."

Sailor just had time to catch Ike one in the stomach—drawing a loud grunt—before the waiters closed in. "These guys will have to get out of here," one of the waiters told us. "Are you two going?"

"No," I said, "we'll stay. I don't want to see any more of them—not right now anyway."

"But Tot," Evelyn whispered, "the check!"

"I'll pay it," I told her. "I'm worth it. And it seems to me 'm worth it."

## Fashions

BY ANNE ADAMS

## Good Morning Frock

Start the day beautifully in this frock as practical as it is pretty. Just as gay in a printed fabric as in those figure-flattering stripes. See-way too!

Pattern 4592 comes in sizes 12, 14, 16, 18, 20; 40. Size 16 takes 4½ yds. 35¢, 36¢, 37¢, 38¢, 39¢, 40¢.

This pattern, easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send twenty-five cents (25¢) in coins (stamps cannot be accepted) for this pattern. Write plainly, please.

Name, Address and Size Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man.

not the only one who's cold-blooded and calculating." I added for her benefit.

"Voice said: 'Mind if I sit down?'"

I looked up and saw Eddie Thorndike. "Not at all," I told him. "This is Miss Hughes. Evelyn met Eddie Thorndike."

"I saw that little set-to," Eddie said. "You wouldn't care to tell me what it was all about?"

"I don't mind," I said. "It was about me."

Eddie looked curious. "You didn't seem to object."

"Eddie," I said, "I never enjoyed anything so much in my life."

"Did you ever hear anything as cruel?" piped Evelyn.

Eddie ignored her. "I figured you must have enjoyed it," he said. "You could have taken the two of them and knocked their heads together if you'd wanted to."

"Sure," I admitted, "and spoil a heap of fun for myself. Put yourself in my shoes. Five or six years ago I've been in the ring, taking all kinds of advice from a couple of old-time managers who never took it into their heads to let me win."

"And fighting for nothing. Not even a little time in the gate."

"I reached for the check and looked at it. 'Cheap at double the price,'" I said.

## Record Purse Total Set In Prairie Loop

WINNIPEG—With a record \$484,400 in purses at stake, the Western Canadian prairie horse racing season opened its 1940 season at Edmonton, May 24, and will continue for 81 days with the closing at Winnipeg, September 15.

The purse total is \$27,800 over the total offerings in 1938. Officials of the R. James Speers Corporation, Ltd., in announcing the dates, said that all Alberta meetings will have a minimum purse of \$700. Saskatchewan will have a \$500 minimum, and a \$1000 and Winnipeg \$1000.

Dates: Edmonton, May 24-June 5; Winnipeg, June 15-July 4; Calgary, July 9-16; Edmonton, July 18-25; July 29-30; Regina, Aug. 1-6; Calgary, August 10-20; Winnipeg, August 31-September 15.

WHEAT PAYMENT BEFORE SEEDING

OTTAWA—Rt. Hon. C. D. Howe, trade minister, reiterated in the House that a payment on western wheat will be made before seeding time.

He told Hazen Angus (C.P.C.—Wood Mountain) he would not indicate how much the payment will be.

Rt. Hon. J. G. Gardiner, agriculture minister, confirmed that he estimated in a recent address that it will be approximately 20 cents a bushel.

Statistics Report More Deaths, Fewer Births

OTTAWA.—In line with other provinces, Manitoba and Saskatchewan showed a small drop in births registered in 1948 according to a report by the Dominion Bureau of Statistics. While the totals were below those in 1947, they exceeded all other years.

Births in Canada numbered 345,480 in 1948, of which 18,630 were in Manitoba and 21,310 in Saskatchewan. In 1947 there were 358,150 births in Canada, with Manitoba having 20,406 and Saskatchewan 23,267. The drop was 3.5 per cent.

Deaths rose to a new high during 1948, while marriages decreased for the second successive year. Deaths increased 2.5 per cent, to 119,470 from 116,580 in 1947. Manitoba and Saskatchewan, however, showed a small drop.

Marriages totaled 123,367, compared with 127,149, a decrease of 2.8 per cent. The number declined in all provinces except Saskatchewan.

CANADA THIRD IN ACCEPTING REFUGEES

LAKESIDE, N.Y.—The International Refugee Organization reported Canada accepted the third largest number of war refugees of any country up to Jan. 1.

Canada received 48,540 refugees during the 18-month period starting July 1, 1947. I.R.O. reported, Britain topped the list with 59,865 and Israel was second with 57,572.

PEGGY BE DEFINITELY

Dr. Chase's NERVE FOOD

Many women find it hard to realize their nerves are "bad." Yet it is not unusual for a high-strung woman's delicate nervous system to get out of balance—especially during the functional changes of adolescence, girlhood, young motherhood and middle life. That's when a good tonic like Dr. Chase's Nerve Food, can do you much good by helping to restore your nervous energy. It will help you get better, look better, rest better at night.

During the last fifty years, thousands of Canadian women of all ages have gone safely and happily

## Practical Demonstrations

Although the R.C.A.F.'s Flight Cadets receive a complete grounding in the classroom in the theory of airplanes, practical demonstrations are also given in the station maintenance section. The two flight cadets shown here are presently attending the Harvard Flying School at Centralia, Ont., having the instruction of the Harvard basic trainer explained to them by a Sgt. Airframe mechanic. They are left to right: Sgt. E. F. Fear, Picher Creek, Alta. (instructor); R/C G. Haines, Lacom, Alta.; and R/C G. Martin, Lethbridge, Alta.

## Western Briefs

## FORECAST IRON MINE

VANCOUVER—Development of a large iron mine and export of British Columbia are foreseen in mining circles here following disclosure of exploration plans by a United States mining company.

## PLENTY FOR WORKER

EDMONTON—The prairie provinces should have no trouble in absorbing nearly every worker that it physically able to work this summer. Fred J. White, of Winnipeg, regional superintendent for the unemployment insurance commission, said.

## FREE HOSPITALIZATION

EDMONTON—Alberta plans to be the first Canadian province to offer free hospitalization and treatment for arthritis sufferers.

## NO LOCKUP

WOODROW, Sask.—A crime wave light, so would cause great confusion at the little village of Woodrow, Sask. The first department purchased some new equipment, which taken up so much room in the crowded fire hall and town lockup that the only jail cell had to be eliminated.

## New Varieties Of Wheat Worthy Of Tests

WINNIPEG.—Canadian plant breeders have developed four new varieties of wheat considered worthy of further testing, a technical committee said after a meeting here.

The breeders are members of the associate committee on plant breeding of the national research council and the federal department of agriculture.

A committee statement said a new American wheat variety "has been field-tested throughout western Canada for three years and has been found to be highly desirable in disease resistance, yield and straw strength."

The new wheat yields more than three bushels a day later in maturing than the Marquis variety.

"In addition," said the statement, "three other highly promising varieties which have been tested extensively in western Canada during the last two years are being recommended by the plant breeders for the commercial milling and baking tests."

OLD TO STAGE AUTO BONSPILL, 1950

CALGARY—Alberta, only prairie province which has not yet staged an automobile bonspiel, will join Saskatchewan and Manitoba in the "Big League" curing events in 1950.

Curling officials at the town of Olds, 60 miles north of Calgary, announced that an automobile "spiel" will be held there starting Jan. 8, 1950 with four 1950 model cars as the major prizes.

THAT'S W. J. UPCHARLES ON ELM STREET. I CAN'T IT!

COMPLETELY WITH CONVERTIBLE AND CUBBY CROW-CUT, HAS BEEN BURNING HIS LINE CRAZY, WHICH SHOULD BE A GOOD THING FOR DANCE SOCIETY.

PEGGY BE DEFINITELY

Dr. Chase's NERVE FOOD

Many women find it hard to realize their nerves are "bad." Yet it is not unusual for a high-strung woman's delicate nervous system to get out of balance—especially during the functional changes of adolescence, girlhood, young motherhood and middle life. That's when a good tonic like Dr. Chase's Nerve Food, can do you much good by helping to restore your nervous energy. It will help you get better, look better, rest better at night.

During the last fifty years, thousands of Canadian women of all ages have gone safely and happily

## THE RED CROSS AND YOU

Human suffering takes many forms. It may strike as illness and pain, as misfortune and natural catastrophe, as bewilderment and hopelessness against overwhelming odds.

To alleviate these sufferings, to prevent disease and to promote the health and welfare of the people of Canada—that is the task of the Canadian Red Cross Society, the task of its workers and its members—ever-renewed, ever-necessary.

As a good neighbor, as a responsible human being, each one of us wants to aid distress wherever we may find it and to prevent, if possible, its occurrence. In the complexities of the modern world, one man's hand is not enough. Only the co-operative effort of a great society, geared to work efficiently, quickly and humanely, can hope to stem the flood of misfortune, of accident and emergencies that can overtake any one of us. Only a great Society, international in scope, can bring hope to millions of our fellowmen in other portions of the war-scarred globe.

Highest of human ideas—concern with the welfare of others—is the motivating force of the Red Cross. To translate this idea into action, Red Cross and its thousands of volunteer workers need the help of every person in Canada. By contributing your share in the 1949 March appeal for \$5,000,000, which opened Monday, you become an active partner in one of the greatest humanitarian forces working for good in the world.

## LITTLE ITEMS OF LOCAL INTEREST

Mrs. Isabel Goodie was a week end visitor in Carbon.

Mr. and Mrs. James Hunt and family of Calgary spent the week end visiting relatives and friends in Carbon.

Mr. and Mrs. Jim Nodesty and family of East Coulee spent the week end in Carbon.

Buster Simpson was a Calgary visitor last week, returning with a new car.

William Hammel returned to his home in Carbon last week after spending the past four months in the Drumheller hospital. Mr. Hammel had his foot crushed in an accident in a Deumbeller mine and as a result had to have the member amputated below the ankle. He is now able to get about with the aid of crutches.

## DON'T WAIT

When I quit this mortal shore, and nose around the earth no more, don't weep, don't sigh, don't sob; I may have struck a better job. Don't go and find a large bouquet for which you'll find it hard to pay; don't move around and feel all blue; I may be better off than you. Don't tell the folks I was a saint or any old thing that I ain't; if you have jam like that to spread, please hand it out before I'm dead. If you have roses bless my soul, just pin one in my buttonhole while I'm still alive and well today.

Don't wait until I've gone away.

## FAR NORTH SPORT

A Skay Hills resort, which has seen initial development on its Muskoka, Ont. site, has now resolved itself into a club with some fascinating ideas requiring \$1 million to develop.

It proposes to operate as the nucleus of a network of hunting and fishing outposts stretching as far north as Hudson Bay.

The idea is that a member goes to Club Sky Hills at Vernon, six miles west of Huntsville, Ont. He leaves his wife and children at the lodge there, to enjoy its recreational facilities. He then climbs into a sea-plane, and, within hours, finds himself at one of the eight outposts where the surroundings are more rugged, but the fishing and hunting better.

At the outset, the member is expected to pay a \$1,000 fee, covering his membership dues for life. It also includes every member of his family.

From then on it's only a matter of paying for his accommodation. Rates for this have yet to be decided, as it will depend on the number of members who enlist.

## COSTLY QUESTION

It costs money sometimes even when asking "How Much?", Napier Moore tells this story in the Financial Post: With the aid of a lawyer, a friend of ours has been settling his father's estate. Recently he telephoned the solicitor and asked if he'd send his account so that the whole business might be cleaned up. The account arrived; the usual itemized bill recording consultations, letters written, telephone calls at a dollar each, etc. A medical fellow, our friend checked it item by item. Every charge but one appeared reasonable. He blew his ten on the first entry. It was a charge of \$1 for the telephone call in which he had asked for the bill.

## IN MEMORIAM

KARAS—In loving memory of our dear wife and mother, Lydia Karas, who fell asleep February 21, 1944. Peaceful be thy sleep, darling. So sweet to breath thy name. In life we loved you dearly. In death we do the same. We always think of you, dearest. While our hearts are sad with pain Oh, this would be a Heaven. Could we hear your voice again. Never shall your memory fade. Sweetest thoughts shall ever linger in our lonely hearts.

Sadly missed by Husband, Sons and Daughters.

## MARVELUBE HELPS YOU KEEP DOWN TILLAGE COSTS

Here's why...

The old lubricating oil in your tractor engine contains dirt which increases engine drag, promotes wear and may result in clogged oil filters, thus causing injury to cylinders and bearings.

Refilling with the correct grade of Marvelube for your tractor is good business because—

- 1 Free flowing Marvelube effectively lubricates moving parts for all farm operations.
- 2 Marvelube resists heat—does not break down under continuous operation, but protects against wear under day-in, day-out work.
- 3 Marvelube offers further protection by resisting the formation of carbon and reducing sludge in the crankcase.

Translated into cash benefits for you, the above simply means that frequent servicing with Marvelube lubricants gives your tractor the extra power and smoothness which speeds up all tractor-powered operations on your farm.

Marvelube helps cut down operating costs, aids in avoiding unnecessary replacement of parts, and keeps your tractor on the job longer.

## Now a Little Cripple can run and play

If only you could see the sad faces of those little children! Because some have little twisted feet or legs. Some suffer from internal ill. Some have cleft palates or serious eye ailments. And if only you could see the glow of happiness on those little faces when they come from our Junior Red Cross hospitals perfectly normal again just like other little children.

This is one reason why you will want to give generously to the Canadian Red Cross. Your donation will help to restore sick or crippled youngsters to health and happiness. It will also help to provide Free Blood Transfusions to all who need them; to support Outpost Hospitals, to send relief in case of disaster; to assist veterans in hospitals.

Your donation will help relieve pain and bring comfort and happiness. Give generously to the Red Cross.

Red Cross services also include: Nutrition Service, First Aid and Home Nursing Courses, Swimming and Water Safety, Women's Work Activities, Sick Room Loan Capboards, etc.

This is YOUR work—GIVE!

CANADIAN RED CROSS

When considering your donation, remember that this year the Canadian Red Cross needs \$1 million dollars—40% more than the previous appeal.
